# National Hydrography Dataset (NHD)

---

## NHD Stream Network Extent

---

- ◆ WQS Classified Streams = 24,566 miles
- ◆ Missouri NHD 1:100,000 = 103,866 miles

Question raised at the January 15, 2009 Small Streams group meeting – How many facilities affected by classification of waters at the 1:100,000 scale?

Queried the most current NPDES outfall geodatabase to find the answer.

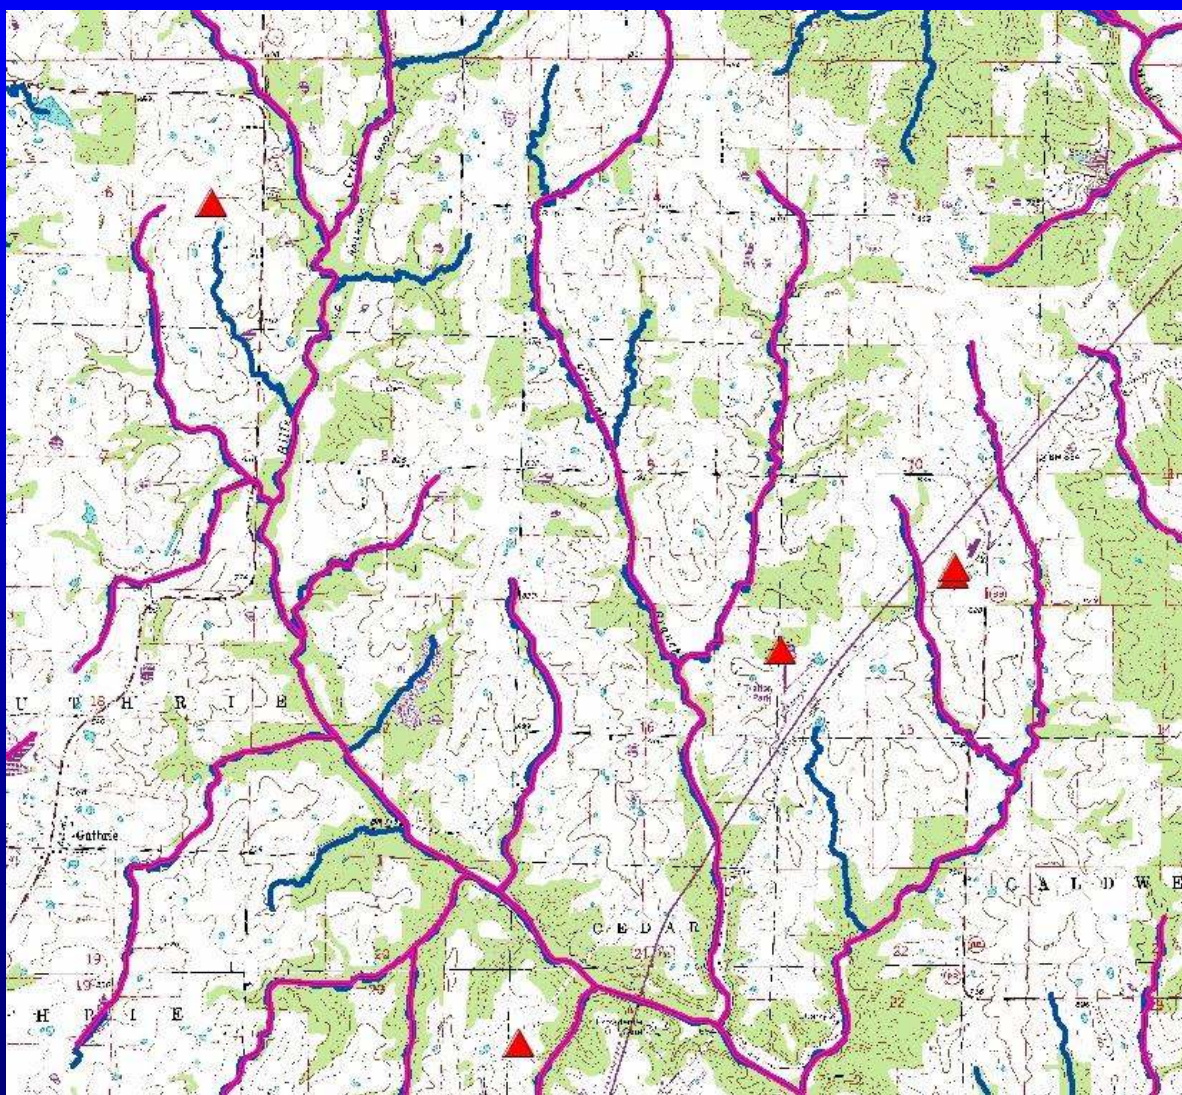

## National Hydrography Dataset (NHD)

---

- ◆ Approximately 90% of site-specific permits are within 1/2 mile distance of the 100K NHD (4,223 outfalls).
- ◆ Approximately 99% of site-specific permits are within 1 mile distance of the 100K NHD (4,610 outfalls).
- ◆ All site-specific permits are within 2 miles distance of the 100K NHD (4,660 outfalls).
